

RITESH SALVE

AI/ML Engineer & Full-Stack Developer | Python · GenAI · LLMs · TensorFlow · Django · AWS · SQL · Power BI
Chhatrapati Sambhajnagar | +91 7709903710 | riteshsalveorg95@gmail.com | [LinkedIn](#) | [GitHub](#)

OBJECTIVE

B.Tech final-year student (Electronics & Computer Engineering, 2026) with expertise spanning **Core AI/ML, Generative AI & LLMs, Cloud & AI Ops, and Full-Stack Development**. Hands-on experience with Python, TensorFlow, OpenCV, OpenAI/Anthropic APIs, LangChain, AWS, Docker, FastAPI/Flask, Django, React, SQL/NoSQL, and Power BI. IEEE published researcher | Top 30/500+ national Cyber Security Hackathon. Seeking a role to build intelligent, scalable AI-powered applications and data solutions.

TECHNICAL SKILLS

Core AI & ML:	Python, TensorFlow, PyTorch, Scikit-Learn, OpenCV, XGBoost, Random Forest, CNN, NLP, Anomaly Detection, Predictive Modelling, EDA, Feature Engineering
Generative AI & LLMs:	OpenAI API, Anthropic (Claude) API, Hugging Face, LangChain, Prompt Engineering, RAG (Retrieval Augmented Generation), ChatGPT API, LLM Integration
Cloud & AI Ops:	AWS (Bedrock, SageMaker, S3, EC2), Azure (Functions, Key Vault, Blob Storage, ADLS), Docker, FastAPI, Flask, CI/CD Basics, Vector Databases (Chroma, Pinecone)
Full-Stack & APIs:	Django, Django REST Framework (DRF), React, Node.js, JavaScript, REST API Design, JSON handling, Postman, Git/GitHub, Agile/Scrum
Data & SQL:	SQL (MySQL, PostgreSQL), NoSQL (MongoDB), Power BI, Tableau, DAX, Pandas, NumPy, ETL Pipelines, Data Cleaning, Transformation & Validation
Electronics & IoT:	Arduino, Embedded Systems, Sensor Integration, HVAC Control, PCB Assembly, Soldering, Multimeter, Oscilloscope, Hardware Testing

PROFESSIONAL EXPERIENCE

Data Analytics Trainee

Aug 2025 – Nov 2025

Scatterpie Analytics

- Built end-to-end **Python AI/ML pipelines** (TensorFlow, Scikit-learn) processing 100,000+ records; developed **REST API data services using Flask** and real-time Power BI dashboards with 100% data accuracy.
- Integrated **LLM API (ChatGPT/Anthropic)** for auto-generated insight summaries; applied anomaly detection and predictive modelling achieving 80%+ accuracy — deployed on Git with Agile workflows.

Data Analyst Intern

Jan 2025 – Mar 2025

Godrej Infotech Ltd.

- Analysed 10,000+ records using **Python, SQL (MySQL/PostgreSQL)**; designed optimised database schemas backing 12+ Power BI dashboards; built ML pipeline reducing stock-out risk by 15%.

PROJECTS

Smart Farm AI/ML Control Center · Python · TensorFlow · OpenCV · Flask · IoT · Scikit-learn · XGBoost · SQLite

■ [Live Demo](#) | [GitHub](#)

- Developed **CNN-based plant disease detection** (TensorFlow/OpenCV) achieving 80%+ accuracy across multiple disease classes; built crop recommendation engine (Random Forest, 90%+ accuracy) using soil NPK, temperature, humidity, pH, and rainfall as features.
- Simulated **real-time IoT sensor data** (temperature, humidity, soil moisture, pH) and applied **Isolation Forest anomaly detection** to flag abnormal readings; deployed all models via **Flask REST API** with SQLite database logging every prediction.
- Integrated **yield prediction model (XGBoost)** for expected output per hectare; built interactive web frontend for disease upload, crop recommendation, and sensor monitoring — fully deployed on Netlify.

Crypto Fraud Analysis Platform · Python · Pandas · Scikit-learn · Matplotlib · SQL · Flask

■ [Live Demo](#) | [GitHub](#)

- Built an **ML-powered cryptocurrency fraud detection platform** analysing trading patterns and market behaviour; applied Scikit-learn classification models to identify fraudulent transactions and anomalous trading strategies from large financial datasets.
- Implemented **market trend prediction** using statistical modelling and time-series analysis in Pandas; generated interactive Matplotlib visualisations for fraud pattern reporting — deployed as a live web application on Netlify.

Customer Churn Prediction & AI Analytics System · Python · XGBoost · Scikit-learn · SQL · Power BI · ChatGPT API · LLM

[GitHub](#)

- Built end-to-end **ML pipeline** (Random Forest, XGBoost) predicting customer churn across 7,043 records; integrated **ChatGPT API (LLM)** to auto-generate natural language business insight summaries from model outputs.
- Deployed a **4-page interactive Power BI dashboard** with Red/Yellow/Green risk scoring on Churn_Probability column; identified 1,787 high-risk customers — stored and queried all predictions via **SQL database**.

EDUCATION

B.Tech – Electronics & Computer Engineering | Sanjivani College of Engineering, SPPU | 2022 – 2026 (*Expected*)

CERTIFICATIONS & ACHIEVEMENTS

- Data Analyst Certification — One Roadmap (May 2025)
- Data Science & AI Training — Python, TensorFlow, ML pipelines, LLM integration & predictive modelling (Jul 2024 – Jan 2025)
- Software Programmer Certification — IT ITes NSDC / NCVET (Dec 2023)
- Cyber Security Hackathon — **Top 30 / 500+**, D.Y. Patil University, Pune
- IEEE Publication: 'Analysis of Cloudlets Performance using ML with Cloud Management System' — AI/ML cloud architecture & performance analysis.
